Professional Summary

Full Stack Developer with expertise in developing, implementing and scaling web applications for growing teams and evolving products. Consistently deliver projects with robust and accurate architecture solutions, lateral thinker that focuses on the longevity and adaptability of code

Work History

Arivo June 2022 - Present

Architecting and developing a reusable, schema-based form generator component. Overseeing its evolution and ensuring that all new functionality works harmoniously with the current code base.

- Setting up asynchronous validations and logic for dependencies between form items
- Expediting internal application development time with dynamic and customizable field input components

Clearlink September 2019 - June 2022

Optimized and developed components built with VueJs for the sales of telecom products. Maintained and integrated various brand partner APIs with PHP while implementing test driven development.

- Helped to implement the 'AutoSave' feature which dramatically increased the speed of the application
- Worked with software development team members to design and develop robust solutions to meet client requirements for functionality, scalability and performance.
- Reviewed project specifications and designed technology solutions that met or exceeded performance expectations.

Radiant August 2018 - August 2019

Lead the life-cycle of a client facing content management system, including its architecture, development, testing and implementation of new features.

- Eliminated hours of time that was previously spent manually inputting and extracting data by providing internal company users with means to independently analyze, upload and modify their content
- Developed critical bug fix to resolve data mismatch between API and database by creating a translator for the graphQL schema, decreased delays from one week to two days
- Migrated customer facing site to React, eliminated expenses for third-party hosting and third-party developers
- Kept code clean and robust through designing dynamic, reusable React components

Skills

- Strong Interpersonal & Communication Skills
- Source & Version Control
- New Feature Development
- JavaScript Libraries & Frameworks
- Code & Quality Standards
- MVC Architecture
- Time Management & Prioritization
- PHP
- VueJS
- React
- HTML/CSS

Education

Utah Valley University May 2018

Associate of Science
